## **About The Industry**

The sudden rise in infrastructure projects and foreign investments in aeronautics and automobile sectors have boosted the demand for Industrial tools, equipment and technology within a cross-section of industries. While the global Hand Tools Industry was valued at a whopping US\$24.6 Billion in 2022, expected to cross the US\$30 Billion mark in the next 5 years; the demand for Machine tools reached a new high last year with total business of US\$87.94 Billion in 2022 and growing at an impressive CAGR of 5.7%.

Advancements in Laser Technology, Robotics and Industrial Automation have led the cause in the transformation of a number of industries including Metalworking, Machinery and Manufacturing in sectors like Aerospace, Automotives and Infrastructure development. The steady requirement for power tools reached a new high with an incredible market valuation at US\$26.61 Billion. This surge in demand is directly correlated to the promising rise in projects in construction, aerospace and automotive sectors.

Meanwhile, the Government of India in its 2023-24 Union Budget announced the capital investment of US\$122 Billion for infrastructure projects, a sharp increase by 33%, thereby joining the Asian infrastructure boom in flying colors. The rising numbers in market valuation clearly underline Government's enthusiasm in such projects. The Power Tools market is booming consistently with close to a Billion Dollar in domestic trade. The very segment shows an impressive CAGR of 8.9% over the next five years, indicating greater investment and increased supply chains.

Such promising numbers have, over the years, created a need for platforms where the latest in technology and innovation could be showcased to the relevant audiences. This is why shows like HTF Expo- Hand Tools, Power Tools and Fasteners Expo, along with collocated events – Cutting and Welding Exhibition, International Machine Tools Expo, Used Machinery and Allied Industries have become industry standard in the Indian and International Exhibition and Trade Show Arena.

## **About The Exhibition**

The 21st edition of HTF Expo, the Hand Tools, Power Tools and Fasteners Expo opened to an overwhelming response from industry and trade visitors at the Bombay Exhibition Centre in Mumbai, India from 1-3 September 2023. Collocated with CWE - Cutting and Welding Expo, IMEX - International Machine Tools Expo, UMEX - Used Machinery Expo and a tech India TECHINDIA, leading exhibition on Engineering & Manufacturing, the event this year marked the meteoric yet well deserved rise of Robotics, Industrial Automation and product innovation across the cross section industries.

With over 250 companies and brands exhibiting their finest and groundbreaking product range, the exhibition provided a unique platform for visitors and exhibitors to connect with each other and create mutually-beneficial business relationships.

The concurrent seminar on Latest Technology for Manufacturing & Maintenance Industries featuring eminent speakers from India's leading brands serves as an excellent opportunity for knowledge transfer and a chance for business networking among the delegates and attendees.

With a promise for an even bigger participation and stellar range of products on display, the 22nd edition of HTF and collocated exhibitions will be hosted at Pragati Maidan, New Delhi from 29-31 August 2024.
